ADVICE AND PRESSURE

Data for information purposes only, which may vary according to the actual conditions of use. In the event of use outside normal conditions of use, these recommendations must be adapted. Consult a professional.

We differentiate between cold and hot pressure. Cold pressure varies in accordance with the air/ground temperature and the length of the special stages. The hot pressure corresponds to the value measured at the end of the special stage.

We recommend a **COLD PRESSURE, i.e. on departing the "pit", of 1.8 bar.** Just before starting the special stage, the pressure must be retaken as indicated below:

N5 CATEGORY

	Stages < 10°	Stages > 15° & < 30°	Stages > 30°	
Asphalt	1.8 b	1.7 b	1.6 b	2.0 b
Gravel	2.0 b	1.8 b	1.7 b	2.1 b
Snow	1.8 b	1.7 b		
Ice	1.8 b	1.7 b		b: bar

N3 & N2 CATEGORIES

	Stages < 10°	Stages > 15° & < 30°	Stages > 30°			
	Front	Rear	Front	Rear	Front	Rear
Asphalt	1.8 b	2.0 b	1.7 b	1.8 b	1.6 b	1.7 b
Gravel	1.9 b	2.0 b	1.8 b	1.9 b	1.7 b	1.8 b
Snow	1.8 b	1.9 b	1.7 b	1.8 b		
Ice	1.8 b	1.9 b	1.7 b	1.8 b		b: bar

The aim is to have a **HOT PRESSURE** between

SET UP ADVICE

Asphalt	2.0 b to 2.3 b	2.1 b to 2.3 b
Gravel	2.2 b to 2.5 b	2.1 b to 2.3 b
Snow	1.9 b to 2.2 b	
Ice	1.9 b to 2.2 b	b : bar

SET UP ADVICE

It is important to measure the pressure at the end of the special stage in order to know the hot value that corresponds to the operating pressure.

If the operating pressure is:

- below the operating range: no grip felt.
- above the operating range: appearance of vehicle mobility and deterioration of wear features.

If the pressure at the end of the special stage is too high, it is recommended this is adjusted and a maximum of 200 grams removed. In the wet, there should be no hesitation in raising these pressures back up, as the tyre gains no or little in temperature, and what's more, this is more efficient in evacuating water. The longitudinal lines allow for water evacuation and preventing aquaplaning, while the "unblockers" improve grip in the event of pollution.

88G CO2 REFILLABLE CARTRIDGE

THE HIGHEST CO2 CAPACITY
ON THE MARKET!

INFLATE FUNCTION

REFILLABLE THROUGH
MICHELIN MOTOSPORT'S DEALERS

EXCHANGE A FULL CARTRIDGE
FOR AN EMPTY ONE

RESULTS

Refill a standard car tyre completely, or
adjust the pressure on all 4 tyres (300g per tyre)

For example:

1.490 bars for 1 205x55x16 tyre
or 0.372 bars for each 1 of 4 tyres

MICHELIN PILOT SPORT A SS01, S10, M20, H30

NEW

WHEATHER

**SAVE UP TO 0.7 SECONDS
PER KILOMETER⁽¹⁾**

ALMOST INSTANT WARM-UP

The tread is made of a new type of rubber to reach the correct operating temperature more quickly.

PRECISE AND IMMEDIATE FEEDBACK

Thanks to a reinforced carcass, the tyre provides better lateral and braking support compared to the MICHELIN Pilot Sport R. It therefore reacts quickly to driver inputs.

INCREASED LONGEVITY

Up to 30%⁽²⁾ longer life compared to the equivalent compound in the previous MICHELIN Pilot Sport R range, thanks to a new rubber compound and tread pattern that spreads the effects of mechanical stress evenly over the entire tread surface..

LONGITUDINAL GRIP

The innovative tread pattern provides traction on polluted roads and improves braking performance.

(1) 0.73 s/km faster with the MICHELIN Pilot Sport A S10 compared with the MICHELIN Pilot Sport R 11 in wet/dry conditions. Internal studies carried out in February 2020 in France on Skoda R5 and November 2019 in Spain on Citroen R5.

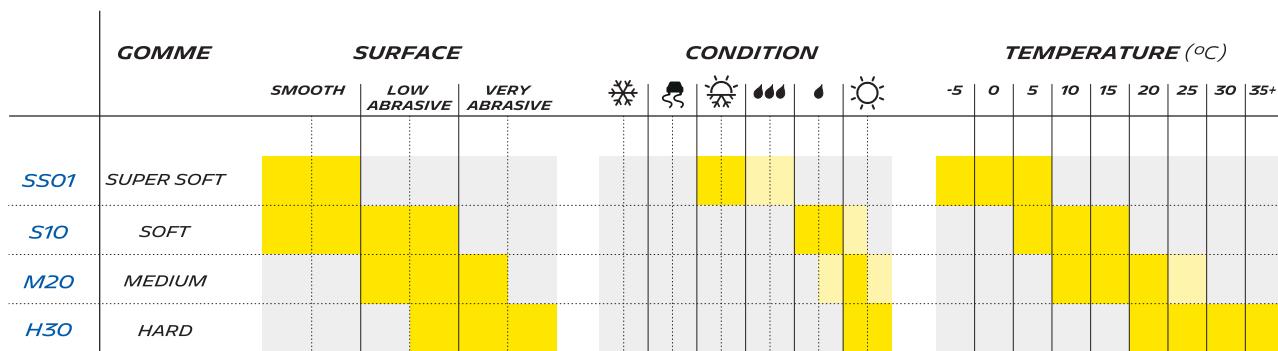

(2) Internal study carried out in May 2020 in France on Skoda R5.

**NEW ELASTOMER**

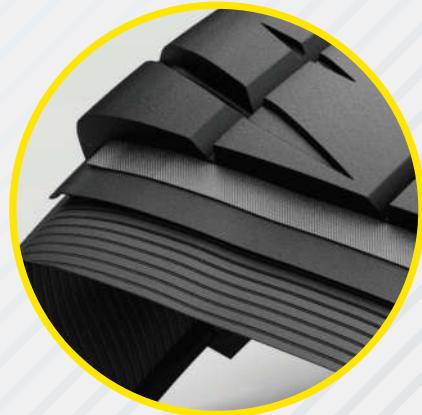

This new synthetic rubber is designed to give warm-up and grip.

**INNOVATIVE SCULPTURE**

Transverse grooves on the inside and outside of the tread provide grip on slippery surfaces.

**NEW ARCHITECTURE**

A new layout of the plies on top of the tyre provides greater rigidity, thus optimising driving precision.

MICHELIN PILOT SPORT A MW1

THE GRIP FOR WET AND DRYING ROADS

GRIP FOR WET AND DRYING

Specially designed for driving on rainy and dry roads. The MICHELIN Pilot Sport A MW1 has a notch rate(1) that is twice as high as the MICHELIN Pilot Sport R P01, giving it excellent water evacuation. The transverse notches also allow it to find traction in the event of a change in grip (polluted roads, mud, gravel, etc.).

WARM UP

The MICHELIN Pilot Sport A MW1's «lightning-fast» tread pattern, which heats up the rubber and the carcass, ensures that the MICHELIN Pilot Sport A MW1 can be brought up to speed quickly.

PRECISE AND IMMEDIATE FEEDBACK

Thanks to its reinforced carcass, the MICHELIN Pilot Sport A MW1 guarantees very good lateral and braking support. The tyre reacts quickly to driving instructions.

(1) Volume notching rate

RECUTTING

Recutting modifies the tyre characteristics and performances. This operation requires suitable equipment and tools and compliance with the instructions.

Before starting to recut the desired tyre, we recommend you carry out a few tests on a used tire in order to correctly assess the depth and width of the grooves. This will prevent damaging the casing plies located under the rubber.

Recutting a tyre that has already been used (not new), is prohibited. Recutting or regrooving ECE R30 homologated tyres, thus intended for use on public roads, is prohibited.

Contact **Michelin** services prior to any recutting operation : **00 33 (0) 4 73 30 14 55**.

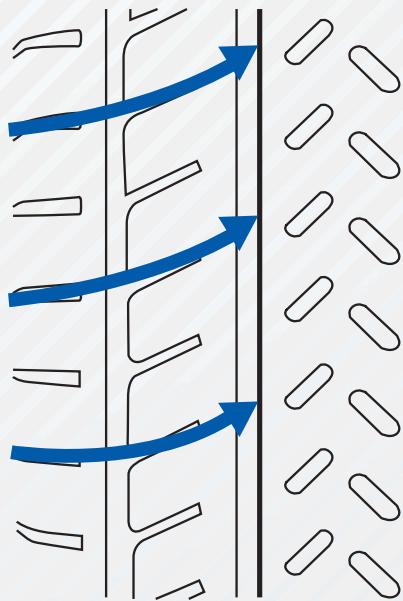

RECUTTING PLAN FOR A MICHELIN PILOT SPORT R TYRE

UPGRADE YOUR RACE PERFORMANCE!

MICHELIN Track Connect is an app made to upgrade your driving performance on circuit.

The **Motorsport mode** is specifically made for racing use, rally and circuit coming soon. It provides real time data allowing you to use your MICHELIN racing tyres to their full potential.

MICHELIN TRACK CONNECT

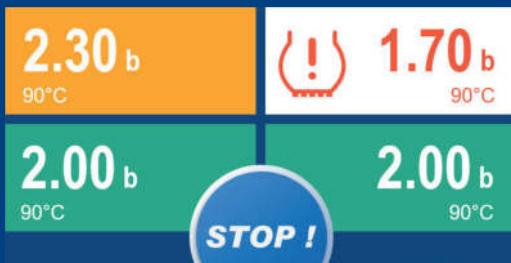

MOTORSPORT MODE

BENEFICES DE L'APP MICHELIN TRACK CONNECT MODE MOTORSPORT :

- Optimize the race performance by starting with the pressures recommended by the app. This pressure is specific to the vehicle, the use, compound fitted and the driving conditions.
- Improve lap time and handling during races by consulting the real time pressures on the smartphone.
- Use the full potential of the tyres by analysing the data recorded during a run and adapting pressures for the next.

Receive data directly on the smartphone thanks to the sensor installed in the MICHELIN racing tyres.

PUNCTURE WARNING

Drive more safely during the races and be warned directly on the smartphone of a slow puncture thanks to an alert.

RECOMMENDATIONS

Update : 1st September, 2020

*Data for information purposes only, which may vary according to the actual conditions of use.
In the event of use outside normal conditions of use, these recommendations must be adapted.
Consult a professional.*

Michelin Competition tyres are intended for competition use on closed roads and not for road use outside of competitions.

- Exceeding certain recommendations (e.g. Camber or low pressure) may cause deterioration to the tyre or a drop in performance: quicker tyre wear, impact on vehicle balance (under- or oversteer).
- The integrity of the rally tyre construction is guaranteed for the wear or grip potential.
- These recommendations extend beyond driving hazards such as punctures.

Contact the Michelin Rally technical services for any use outside the defined recommendations.

> Tel. 00 33 (0) 4 73 30 14 55.

ASPHALT RALLY

16/57 - 14

16/57 - 14 R11 - R21 / SA30 / P01

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	310 DaN
Vitesse max / Max speed	190 Km/h
Jante nominale / Nominal Rim	6 (+/- 0,5) J 14
Pression minimum à froid / Mini cold pressure	1.6 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints Pression minimum à chaud / Mini hot pressure

Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

18/65 - 15

18/65 - 15 FW2R Full wet

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	380 DaN
Vitesse max / Max speed	210 Km/h
Jante nominale / Nominal Rim	8.0 (+/- 0,5) J 18
Pression minimum à froid / Mini cold pressure	2.2 Bar
Relais / Stints	NA Km

19/58 - 15

19/58 - 15 P01 / R11 - R21 R - R31

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	400 DaN
Vitesse max / Max speed	190 Km/h
Jante nominale / Nominal Rim	6.5 (+/- 0,5) J 15
Pression minimum à froid / Mini cold pressure	1.6 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints Pression minimum à chaud / Mini hot pressure

Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

20/58 - 15

20/58 - 15 R11 R - R21 R - P01 R

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	NA DaN
Vitesse max / Max speed	NA Km/h
Jante nominale / Nominal Rim	7.0 (+/- 0,5) J 15
Pression minimum à froid / Mini cold pressure	NA Bar
Relais / Stints	NA Km

Nb de relais / Nb stints	Pression minimun à chaud / Mini hot pressure
Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

19/60 - 16

19/60 - 16 P01 / R11 - R21 R - R31

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	420 DaN
Vitesse max / Max speed	190 Km/h
Jante nominale / Nominal Rim	6.5 (+/- 0,5) J 16
Pression minimum à froid / Mini cold pressure	1.6 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints	Pression minimun à chaud / Mini hot pressure
Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

19/63 - 17

19/63 - 17 P01 / R11 R - R21 R - R31

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	430 DaN
Vitesse max / Max speed	190 Km/h
Jante nominale / Nominal Rim	7.0 (+/- 0,5) J 17
Pression minimum à froid / Mini cold pressure	1.6 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints	Pression minimun à chaud / Mini hot pressure
Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

20/63 - 17

20/63 - 17 R11 R - R21 R

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	430 DaN
Vitesse max / Max speed	190 Km/h
Jante nominale / Nominal Rim	8.0 (+/- 0,5) J 17
Pression minimum à froid / Mini cold pressure	1.6 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints	Pression minimun à chaud / Mini hot pressure
Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

20/65 - 18

20/65 - 18 MW1 RFID/ P01 / R01 - R11 - R21 R - R31 - R32 - R33 / SS01 - S10 - M20 - H30

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	380 DaN
Vitesse max / Max speed	210 Km/h
Jante nominale / Nominal Rim	8.0 (+/- 0,5) J 18
Pression minimum à froid / Mini cold pressure	1.6 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints	Pression minimun à chaud / Mini hot pressure
Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

24/65 - 18

24/65 - 18 R11 R - R21 R / SA02 - SA20

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	300 DaN
Vitesse max / Max speed	220 Km/h
Jante nominale / Nominal Rim	9.0 (+/- 0,5) J 18
Pression minimum à froid / Mini cold pressure	Minimum 1.6 - Maximum 1.98 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints	Pression minimun à chaud / Mini hot pressure
Carrossage / Camber	Mini 2.0 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

24/65 - 18

24/65 - 18 PE00 / PE01

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	300 DaN
Vitesse max / Max speed	220 Km/h
Jante nominale / Nominal Rim	9.0 (+/- 0,5) J 18
Pression minimum à froid / Mini cold pressure	1.8 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints **Pression minimun à chaud / Mini hot pressure**

Carrossage / Camber	Mini 2.1 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

29/65 - 18

29/65 - 18 SA20 - SA32 / R21 R - R31 R

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	420 DaN
Vitesse max / Max speed	220 Km/h
Jante nominale / Nominal Rim	12.0 J 18
Pression minimum à froid / Mini cold pressure	Minimum 1.6 - Maximum 1.7 Bar
Relais / Stints	NA Km

Nb de relais / Nb stints **Pression minimun à chaud / Mini hot pressure**

Carrossage / Camber	Mini 2.1 à max 2.3 Bar
Max pince -30, carrossage max 2°	1

29/65 - 18 PE00 P01

Usage	Rally Asphalt
Charge max / Max Load (static + dynamic)	420 DaN
Vitesse max / Max speed	220 Km/h
Jante nominale / Nominal Rim	12.0 J 18
Pression minimum à froid / Mini cold pressure	1.8 Bar
Relais / Stints	NA Km

 COMPORTEMENT

ADVICE AND **PRESSURE**

Data for information purposes only, which may vary according to the actual conditions of use. In the event of use outside normal conditions of use, these recommendations must be adapted. Consult a professional.

We differentiate between cold and hot pressure. **COLD PRESSURE** varies in accordance with the air/ground temperature and the length of the special stages. The **HOT PRESSURE** corresponds to the value measured at the end of the special stage.

We recommend a **COLD PRESSURE**, i.e. on departing the "pit", of 1.8 bar.

The aim is to have a **HOT PRESSURE** between

DRY CONDITION	WET CONDITION
2.0 bar to 2.3 bar maximum	2.1 bar to 2.3 bar maximum

It is important to measure the pressure at the end of the special stage in order to know the hot value that corresponds to the operating pressure.

If the operating pressure is:

- below the operating range: no grip felt.
- above the operating range: appearance of vehicle mobility and deterioration of wear features. If the pressure at the end of the special stage is too high, it is recommended this is adjusted and a maximum of 200 grams removed.

In the wet, there should be no hesitation in raising these pressures back up, as the tyre gains no or little in temperature, and what's more, this is more efficient in evacuating water.

The longitudinal lines allow for water evacuation and preventing aquaplaning, while the "unblockers" improve grip in the event of pollution.

88G CO2 REFILLABLE CARTRIDGE

THE HIGHEST CO2 CAPACITY
ON THE MARKET!

INFLATE FUNCTION

REFILLABLE THROUGH
MICHELIN MOTOSPORT'S DEALERS

EXCHANGE A FULL CARTRIDGE
FOR AN EMPTY ONE

RESULTS

Refill a standard car tyre completely, or
adjust the pressure on all 4 tyres (300g per tyre)

For example:

1.490 bars for 1 205x55x16 tyre
or 0.372 bars for each 1 of 4 tyres

MICHELIN TB5+

Available in 13" and 15"

Road approved

Two compounds:

F = soft - R = Medium

WHEATER

**DESIGNED FOR THE CLASSIC CAR
RALLIES ON DRY ROADS**

**IMPORTANT GRIP ON DRY AND
ABRASIVE ROADS**

New rubber formula⁽¹⁾ providing a quick warm-up and grip on dry and abrasive roads. Available in 2 compounds that will allow for adapting to several condition.

**EASE OF HANDLING**

New architecture⁽¹⁾ and new rubber formula⁽¹⁾ allowing the tyre to quickly reach the correct operating temperature and thus facilitates steering and confidence.

Road approved

WHEATER

**A MIXED TYRE FOR CLASSIC CAR
RALLIES**

**IMPORTANT GRIP ON WET ROADS**

The MICHELIN TB15+ comprises several longitudinal lines allowing it excellent water evacuation.

**CONSISTENT PERFORMANCE**

Designed using a rubber formula that allows for maintaining consistent performance under changing wet conditions.

DIAMETRE	SIZE	TL	RANGE
13 "	16/53 - 13	TL	TB15+
	20/53 - 13	TL	TB15+
	18/60 - 15	TL	TB15+
	23/62 - 15	TL	TB15+
	26/61 - 15	TL	TB15+

MICHELIN PB20

CLASSIC COMPETITION

WHEATER

THE CLASSIC CAR RALLY MAXI-RAIN SPECIAL

IMPORTANT GRIP ON SOAKING WET ROADS

Thanks to a groove rate greater than that of the MICHELIN TB15+, the MICHELIN PB20 allows for rally driving on roads with a very high water level.

DIAMETRE	SIZE	TL	RANGE
15 "	18/60 - 15	TL	PB20
	23/62 - 15	TL	PB20

Available in 15"

Road approved
